THE MACHINES ARE MOVING FASTER THAN THE TRUTH: AI WAR, CRACKED ETH, $0.05 CODERS

This week the AI world ran on headlines, view counters and a price tag, and almost nothing else. A video titled 'AI Civilization War' has 91673 views, Grok 5 is billed as 'the most powerful AI ever' with 136,630 views and no proof, and Jensen Huang's 'next wave' has 200,430 views and no explanation. Meanwhile Gemini 4 Carbon and an 'Anthropic IPO' collide with an 'ETH cracked' claim that nobody can define, and Particle-1 appeared on OpenRouter at $0.05 per 1M input tokens with a context window of 1048576 tokens. None of the viral claims is verified, but the pace is real, and the question is who is left to check what comes next. We will keep checking. Only the truth.
